

_____ ADH

_____ Oxytocin

_____ TSH

_____ ACTH

_____ GH

_____ LH

_____ FSH

_____ PRL

_____ TH

_____ Calcitonin

_____ PTH

_____ Aldosterone

_____ Cortisol

_____ Androgens

_____ Epinephrine

_____ Norepinephrine

_____ Melatonin

_____ Glucagon

_____ Insulin

_____ Estrogen

_____ Testosterone

_____ Thymosin

A. Medullary

chromaffin cells

B. Gonads

C. Pancreas

D. Zona fasciculata

E. Adrenal medulla

F. Catecholamines

G. Thymus

H. Gonadocorticoids

I. Mineralocorticoids

J. Adrenal gland

K. Alpha cells

L. Thyroid

M. Hypophysis

N. Adenohypophysis

O. Parafollicular cells

P. Testes

Q. Zona reticularis

R. Glucocorticoids

S. Pancreatic islets

T. Ovaries

U. Adrenal cortex

V. Thyroid follicles

W. Beta cells

X. Zona glomerulosa

Y. Neurohypophysis

Z. Parathyroid

AA. Pineal gland

BB. Pinacocytes

CC. Parathyroid
