

Respiration → gas exchange between atmosphere & body.

Inspiration
 pressure in lung
 is below _____
 pressure.

_____ of diaphragm
 & _____
 lungs _____.
 pressure _____.
 This is active or
 passive?

① Pulmonary
 Ventilation
 moving air in &
 out of lungs.

② External Respiration
 Exchange between
 _____ & _____

③ Internal Respiration
 exchange between
 _____ & _____

④ Cellular Respiration
 production of _____
 & consumption of _____.

This is also known as

Expiration
 muscles _____.
 Elastic lungs _____.
 what disease is this
 a problem with?

Volume _____
 Pressure _____
 This is active or
 passive?
 How can it become
 the opposite?

steps:
 ① _____
 ② _____
 ③ _____
 ④ _____
